

## **CLM PARTNERS WITH "DMP CARDIO"**

### **A HIGH VALUE-ADDED PROJECT CREATED BY THE UFCV\***

**SNEAK PREVIEW AT THE 2008 CNCF CONFERENCE**

**16 TO 18 OCTOBER**

**Paris, October 14 2008** – Cegedim Logiciels Médicaux (CLM), software publisher and service provider to the medical profession, announces that it has been selected to partner with the UFCV\* to create the “DMP Cardio”. This project for the care of patients with an Implantable Medical Device (DMI) and for secondary prevention comprises a common platform that is compatible with the Professional Medical File (DMPPro) and the future Personal Medical File (DMP).

#### **Developing a special “DMP-Cardio-compatible” version of Cardiolite**

Cegedim Logiciels Médicaux has fine-tuned its Cardiolite 6 software to meet the technical requirements of this trail-blazing project. Six **patient care forms**, specially designed according to cardiologists’ specifications, have been **incorporated into the existing software**. The DMP-Cardio-compatible version of Cardiolite 6 will be presented for the first time at the **20<sup>th</sup> annual conference of the *Collège National des Cardiologues Français (CNCF) association of French cardiologists***, to be held at the Palais des Congrès in Nice from 16 to 18 October, **at stand number 31**.

#### **Cegedim Logiciels Médicaux brings to the project:**

- **Simplicity:** the software’s basic architecture makes it possible for cardiologists to add on functions with a simple click. CLM’s developments continue to take into account the requirement for simplicity and time-saving in its day-to-day practice.
- **Universality:** this **version is targeted at all cardiologists**; as a simple update for current users, as a step up for computer-equipped physicians who want to incorporate this project into their specialty, and as an initial installation for physicians who are not yet equipped.
- **Training:** a nation-wide training schedule is already in place, and online distance training is provided by experts.
- **Local assistance:** CLM’s network of regional offices allows it to provide cardiologists with personalized service.

- **Tailored financing, tailored set-up:** CLM takes into account the cardiologist's existing system before proposing a personalized technical set-up, and the company searches out the most appropriate financing conditions for the client.

*"We are pleased to be putting our expertise in medical software to work for a project that will change the way cardiologists do business. The UFCV's DMP project is modern, trail-blazing and offers tremendous value added, especially since it aims to be a long-term project. We think that CLM was chosen as an IT partner because of our software is easy to use and adaptable, which will allow it to make a lasting contribution,"* declared Régis Sénégo, CEO of CLM.

#### **About Cegedim Logiciels Médicaux (CLM):**

CLM is a subsidiary of France's Cegedim Group, a leader in medical IT, and offers a broad range of software called *LC 2008* and services for healthcare professionals.

*LC 2008* ensures that physicians' IT equipment complies with the latest technical and regulatory requirements while allowing them to choose the solution best suited to their specialties and type of practice (private practices, clinics, healthcare centers and networks). Structured, communicative, interoperable, and scalable, the *LC 2008* line of software (Crossway, MédiClick ! Studio, Doc'ware, Cardiolite, Eglantine, Megabaze, Medigest) is designed with information sharing and the DMP (French Personal Medical File) in mind.
