

CEGEDIM LOGICIELS MEDICAUX MAKES A SPLASH AT THE MEDEC CONVENTION WITH ITS NEW *LC 2009* RANGE OF SOFTWARE

Paris, March 10, 2009 – Cegedim Logiciels Médicaux (CLM), software publisher and service provider to the medical profession, will be unveiling the latest version of its physician software solution at the MEDEC* 2009 convention at **Stand G8 - Espace Informedica**.

***LC 2009*: the response to the industry challenges facing physicians**

All of the **software offered in the *LC 2009* range** – Crossway, Doc'ware, MédiClick ! Studio, Cardiolite, Eglantine, Mégabaze and Médigest – comes with the same high level of technological performance and functionality: agendas and appointment scheduling; administrative management and history of patient files; standard consultation forms; course of care management; and more.

They provide healthcare professionals with:

- Ease of use
- Time savings
- High-performance technology
- Regulatory compliance
- Secure communications

As powerful as ever, the 2009 version of ***Logiciels Cegedim – LC 2009*** – is even more user-friendly:

- “one-click consultation” function,
- different pre-defined user settings (beginner, intermediate and expert),
- interface options: explorer, tabs, multi-windows – depending on user preferences,
- a single command prints all documents created,
- send emails from Word,
- free-text fields combine flexibility and the advantages of coding,
- personalized graphics.

A year after Cegedim’s acquisition of 01 Santé, version 8 of the **Mégabaze** software already incorporates the BCB drugs database, SMM® medical messaging and nearly 20 new CERFA forms and personalized screens. It also includes optimized word processing with integrated spell-check and simplified list management.

LC 2009: easier communication with the medical community

Structured, communicative, interoperable, and scalable, the **Logiciels Cegedim 2009 (LC 2009)** range of software is designed with information sharing in mind.

These solutions enable physicians to connect to the platforms used for national and regional coordination (regional DMP, **DM Pro**, pathology monitoring networks, etc.).

Furthermore, they incorporate the GIP-CPS-certified secure medical messaging component, **Secure Medical Mail® (SMM)**, which is interoperable with all approved messaging software for simple and direct electronic communications among peers.

* **For more information on MEDEC**, the general medicine conference scheduled for 11 to 13 March at the Paris Palais des Congrès at Porte Maillot, please visit www.lemedec.com

About Cegedim Logiciels Médicaux (CLM):

CLM is a subsidiary of France's Cegedim Group, a leader in medical IT, and offers a broad range of software called **LC 2009** and services for healthcare professionals.

LC 2009 ensures that physicians' IT equipment complies with the latest technical and regulatory requirements while allowing them to choose the solution best suited to their specialties and type of practice (private practices, clinics, healthcare centers and networks). Structured, communicative, interoperable, and scalable, the **LC 2009** line of software (Crossway, MédiClick! Studio, Doc'ware, Cardiolite, Eglantine, Megabaze, Medigest) is designed with information sharing and the DMP (French Personal Medical File) in mind.
